

STANDARD DILUENT FOR MULTIPLEX ASSAYS

ABSTRACT OF THE DISCLOSURE

The present invention provides standard diluents for use in multiplex assays comprising a biological fluid that normally includes two or more different target analytes but that is substantially free of the two or more different target analytes, as well as kits and methods relating to the standard diluent. The standard diluents of the invention provide an accurate and reliable means to calibrate the amount of multiple target analytes in a single assay.
